Program Completer Data Request Permission Form

The University of Georgia College of Education is accredited by the National Council for Accreditation of Teacher Education until 2020. In 2020, the university is seeking accreditation through the Council for the Accreditation of Educator Preparation. As part of that accreditation, the university must follow its program completers to determine their influence on P-12 students in Georgia. Annually, the university would request a summary of teacher data from its completers. Specifically, this would include student growth rating and associated rating basis – district pretest to posttest data, class mean growth percentile, district mean growth percentile, school mean growth percentile, and other district developed or purchased growth data.

By granting permission, I agree that the University of Georgia can ask the Georgia Department of Education to provide data from my teacher summary to document my influence in K-12 students’ progress. I understand that the university would supply the Georgia Department of Education with my Georgia Professional Standards Commission Teacher Certification number. This number would be used to pull state standardized testing data from the Statewide Longitudinal Data System.

Prior to the data being sent from the Georgia Department of Education to The University of Georgia, my teacher certification identification number would be removed from the data file. By affixing my signature below, I am granting my permission for The University of Georgia to make this request annually to the Georgia Department of Education.

This permission is consistent with O.C.G.A.20-2-210 (e)(2).
